## Allergic Asthma

Designed for health care professionals who desire to learn the latest evidence based medical information as it relates to allergic asthma. This app builds fundamental basic knowledge up to clinical practice with the goal of empowering health care professionals so that they can apply the knowledge learned so that they can assist in bringing the best possible evidence based treatment in allergic asthma.

## Asthma Master

Designed for anyone interested in wanting to learn the latest evidence based medical information as it relates to asthma. This teaches epidemiology, basic science, triggers, how to use medications, and care tips for anyone who has been diagnosed with asthma or has a friend or family member with asthma.
