

Research Strategy: 2025 - 2030

Striving Toward A Future Without Asthma

Our Research Priorities:

We are dedicated to advancing a future without asthma by raising funds and building partnerships to accelerate research, with a focus on:

The Impact of **Social and Environmental Factors** on People Living with Asthma

Understanding the **Causes, Diagnosis, Prevention, and Comorbidities** of Asthma

Advancing **Treatments** and **Symptom Management** for Asthma

Our National Research Programme has sourced

\$800,000

in funding to support

30+

researchers in advancing asthma understanding and treatments

Our Research Commitments:

Empower individuals with lived experience of **asthma** to actively **participate in research**

Increase research funding to become a stronger partner within the asthma research community

Enhance **understanding of asthma** across the lifespan, addressing its complex causes, management, and the impact of environmental, social, and other health determinants

Ensure **knowledge translation** is a mandatory component of all funded research projects.

Doubling our Research Funding by 2030:

“

By 2030, Asthma Canada aims to ambitiously **raise \$2 million in research funding** to drive progress toward a future without asthma and enhance the lives of the 4.6 million people living with asthma in Canada.

”

Jeffrey Beach
President & CEO,
Asthma Canada
